- 03 THINGS TO AVOID
- 04 HOW TO CLEAN CERAMIC COATINGS
- 05 HOW TO MAINTAIN CERAMIC COATINGS

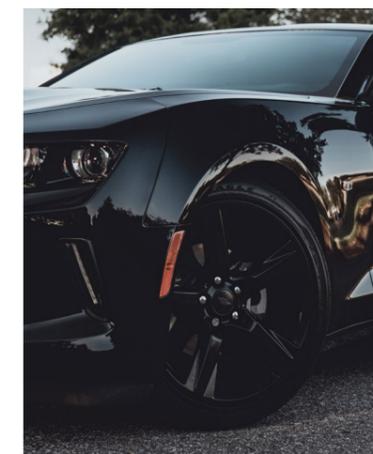

TABLE OF CONTENTS

HOW YOU CAN MAKE THE MOST OF YOUR CERAMIC COATINGS:

- ✓ Keep it dry for at least 24 hours when you get it back. Some coatings may need a cure time of between 2 - 4 days, depending if you've gotten an Awesome Kenzo, or some sweet Quartz+. If you can, keep it indoors too, away from animals that may imprint their paw prints on the surface while you sleep.
- ✓ Avoid washing your vehicle with any chemicals for at least 7 days after the coating has been installed. Use pH balanced soaps like Ecoclean Wash or water to clean it necessary.
- ✓ Avoid heavy degreasers on the ceramic coatings and use ceramic safe products like the Ecoclean and Ecoshine Series from IGL Coatings.
- ✓ Keep your vehicle clean. Either light washing or waterless wash every 2 weeks or whenever dirty.
- ✓ Avoid accumulating dirt and grime on your vehicle.
- ✓ Always dry your car after washing or rinsing. We recommend Ecoshine Enhancer as an excellent drying aid or Ecoclean Jen K.O. as a quick detailer.

TIPS FROM THE EXPERTS !

Ceramic Coatings aren't just for Paint! Keep Headlights, Trims and Wheels looking sharp, clean and protected.

✓ RECOMMENDED LIST

- ✓ **Recommended:** The 2 - bucket wash system is highly recommended. [Click here](#) to know more about what a 2 bucket was does!
- ✓ **Recommended:** Use pH neutral soaps without waxes in it like [Ecoclean Wash](#) or a Ceramic Coating safe snow foam like [Ecoclean Blizzard](#). [Read more about how to wash here](#) or or message us at marketing@iglcoatings.com for our E-book on the Perfect Wash!
- ✓ **Recommended:** Microfiber Cloths or Mitts are great and a soft drying towel to wipe off the excess water. Avoid using chamois, magic sponges or rough sponges that may lead to micro-marrings and swirls.
- ✓ **Recommended:** Dry your car immediately after washing, to prevent it from creating waterspots. Try Ecoclean Enhancer as a superb drying aid. Instant protection in a bottle.
- ✓ **Recommended:** Washing your car when it gets dirty (including after a light rain after dry spells). Rain water, road water and tap water contain high minerals that will create waterspots on your surface. If only certain areas are wet and you may not want to wash the entire car, its [Jen K.O.](#) to the rescue. Just Spray, Wipe and Go! Works great as a waterless wash in tight situations.
- ✓ **Recommended:** Always rinse and wash off bird poo / insect spatter immediately. Its Acidic nature corrodes the surface easily. A good ceramic coating reduces the damage on the clear coat, but should always be removed asap.

TIPS FROM THE EXPERTS !

Keep Separate Wash Mitts and Drying Mitts (and Extras in case they drop!)

RECOMMENDED LIST

ECOCOAT **KENZO** GRAPHENE REINFORCED

The new and improved Ecocoat Kenzo is reinforced with graphene nanoplatelets for increased resistance against water spots and increased durability without sacrificing hardness or clarity. [read more](#)

ECOCOAT QUARTZ+

Our hybrid Quartz+ graphene reinforced coating creates the ultimate layer of protection and perfection. Boasting of deeper gloss, improved water spots resistance and a higher resistance against micro marring and harsh chemicals. [read more](#)

Blizzard's rich, thick, luxurious and long lasting foam adheres to dirt effectively and dissolves impurities by pulling it away gently from the surface to be washed off with ease. [read more](#)

ECOSHINE ENHANCER

Instant hydrophobic in a bottle! Ecoshine Enhancer works on both wet and dry surfaces, enhancing gloss and creating immediate beading effortlessly. [read more](#)

✗ THINGS TO AVOID:

- ✗ **Avoid:** Tree Sap – but sometimes trees give the gift of sap to you, so, you'll want to wash it off or remove it as soon as you can. You'll want to keep a small handy bottle of [Ecoclean Tar](#) in your glove compartment for this!
- ✗ **Avoid:** Automated car washes. [Here's top reasons](#) why it's not the way.
- ✗ **Avoid:** Free Washes / community Washes. Support the Charity but not at the expense of your vehicle.
- ✗ **Avoid:** Crazy Ex-Partners that have a history of keying / spray painting...
- ✗ **Avoid:** Washing in direct heat and sun to avoid waterspots / watermarks and sun-dried products. If this happens, get your trusty Jen K.O. Just Spray, Wipe and Go! For tougher Waterspots (If you've left it for longer). You'll need to get out the big boys – [Ecoclean Delete](#) Safe on Ceramic Coatings. Just remember to rinse off!!
- ✗ **Avoid:** Claying, waxing or polishing the vehicle if it is coated.

TIPS FROM THE EXPERTS !

Avoid parking next to sprinklers or driving behind cement trucks! Hard waterspots can be difficult to remove if left for long periods.

HOW TO CLEAN CERAMIC COATINGS

STEP 1 PRE-WASH

Ecoclean Blizzard
High foaming
pre-wash

STEP 2 DECONTAMINATION

Ecoclean Delete
Stubborn water spot
on body

Ecoclean Jen K.O.
Light water spots

Ecoclean Glass+
Stubborn water spot
on glass &
windscreen

Ecoclean Iron
Iron
decontamination

Ecoclean Tar
Bug, splatter, bird
dropping or tar

STEP 3 WASH

Ecoclean Wash
Stubborn water spot
on body

STEP 4 ENHANCE & MAINTAIN

Half-yearly maintenance

Ecocoat Premier
Refreshes the Ceramic Coating adding longevity to it. Just spray onto a damp microfiber towel and wipe on gently and buff odd excess.

Monthly Or Weekly Maintenance

Ecoshine Enhancer
As a drying aid
& overall gloss
enhancer.

Ecoclean JenKO
For everyday after
wash for doorjamb
& hard to reach
areas.

Ecoclean AIO Spray
After light rain.

INNOVATION & SUSTAINABILITY

IGL Coatings is a multi-award winning Malaysian Technology firm based in Shah Alam focusing on developing innovative, disruptive and sustainable nanotechnology products. Redefining the coatings industry, IGL Coatings pioneered in low and zero VOC ceramic coatings. We have expanded to more than 50 countries and are growing, worldwide. IGL Coatings have worked extensively to improve hazardous formulations by creating eco-friendly, sustainable and low VOC coatings for a better and safer world. The range of coatings by IGL Coatings are from automotive coatings to aviation, marine, industrial coatings, also including our effective and eco-friendly cleaning and maintenance products.
